Acetobacter diazotrophicus SRT4, levansucrase from secreted via periplasm by signal-peptide-dependent pathway, 146
Actinobacillus pleuropneumoniae, adherence to porcine respiratory tract cells inhibited by monoclonal antibodies against lipopolysaccharides, 313
Aedes aegypti, mutations of loops 2 and 3 residues in domain II of *Bacillus thuringiensis* Cry1C δ endotoxin affect insecticidal specificity and binding to, 94
Aeronomas, isolated from landfill, antibiotic response and plasmid profile of, 249
Agaricus bisporus strains, trehalose phosphorylase activity and carbohydrate levels during axenic fruiting in, 205
Alcaligenes sp., isolation, characteristics, and enzyme immobilization of β-lactamase-free penicillin amidase from, 244
Aldolase gene, type B class II, from *Streptococcus pneumoniae*, cloning, sequencing, and chromosomal location of, 31
Alkaline soils, occurrence of salt, pH, and temperature-tolerant, phosphate-solubilizing bacteria in, 89
Alkaliphilic bacteria, effect of growth pH on phospholipid contents of membranes from, 270
5-Aminolevulinic acid dehydratase (ALAD), cloning and sequence analysis of *hemB* gene encoding, 103
Aminopeptidase N, of *Bombyx mori*, Cry1Ac and Cry9Da toxins from *Bacillus thuringiensis* bind as Cry1Aa to, 14
Anabaena sp. PCC 7120, nitrate-assimilation-defective mutants of, 237
Aquaculture pond, characterization of *Methanosarcina mazei* N2M9705 isolated from, 79
Aspartate transcarbamoylase, purified from *Streptomyces griseus*, dodecamer with dihydroorotase activity, 175
Aspergillus, wallboard colonized by, 21
Aspergillus niger, effect of environmental conditions on hyphal morphology in pellets of, 65
Aspergillus ochraceus TS, bioconversion of progesterone by activated immobilized conidia of, 309
Astragalus sinicus rhizobia, characterized by restriction fragment length polymorphism analysis of chromosomal and nodulation genes regions, 358
ATPase, in *Exiguobacterium aurantiacum* membrane, stimulated by Na^+, 27
Automobile air conditioning systems, occurrence and persistence of mixed bacterial–fungal biofilms in, 141

Bacillus, isolated from landfill, antibiotic response and plasmid profile of, 249
Bacillus circulans No.4.1, purification and characterization of chitinase from, 134
Bacillus thuringiensis Cry toxins
bind to *Bombyx mori* aminopeptidase N as Cry1Aa, 14
different solubilization, activation, and degradation of in *Plutella xylostella*, 159
Bacillus thuringiensis Cry1C δ endotoxin, insecticidal specificity and receptor binding affected by, 94
Bacillus thuringiensis subsp. kurstaki NRD-12, expression of *orf1* sequence from *cry2Aa1* operon from, 9
Bacteria, from root-free soil, rhizosphere, and rhizoplane of *Prosopis juliflora*, phosphate solubilization by, 89
Bacteriocin, two-peptide, from *Leuconostoc* MF215B, characterization, purification, amino acid composition, and partial amino acid sequence of, 43
β-chemokines, produced in lungs of mice with mycoplasma respiratory disease, 163
β-lactamase-free penicillin amidase, from *Alcaligenes* sp., isolation strategy, strain characteristics, and enzyme immobilization of, 244
β-mannanase gene (manA), from *Dictyoglomus thermophilum* Rt46B.1, sequencing and expression of, 351
β-N-acetyl-D-glucosaminidase, from *Aspergillus niger*, effect of environmental conditions on activity of, 65
Bile salts, stress response genes in *E. coli* activated by, 68
Biofilms, occurrence and persistence of in automobile air conditioning systems, 141
Bioliths, precipitated by *Marinococcus albus* and *Marinococcus halophilus*, 53
Biopesticides, role of chitinase from *Bacillus circulans* No.4.1 in development of genetically engineered *Bacillus* spp. as, 134
Bombyx mori, binding of *Bacillus thuringiensis* Cry toxins to aminopeptidase N of, 14
Burkholderia cepacia, regulation of expression of nonhemolytic phospholipase C of, 336

Ca^{2+} efflux, from *Nostoc calcicola* Bréb, role of membrane potential, ATP hydrolysis, and calmodulin antagonists in, 254
Campylobacter jejuni, evaluation of cytokine production and phagocytic activity in mice infected with, 129
Carbohydrate levels, during axenic fruiting in *Agaricus bisporus* strains, 205
Carbonates, *Marinococcus albus* and *Marinococcus halophilus* biomineralization of, 53
Carboxin-resistant mutants, of *Ustilago maydis*, pathogenicity to *Zea mays* of, 291
Chaetomium, wallboard colonized by, 21
Chitin synthase (chs) disruptants, of *Ustilago maydis* obtained from carboxin-resistant cassettes, pathogenicity to *Zea mays* of, 291
Chitinase, from *Bacillus circulans* No.4.1, purification and characterization of enzymatic properties of, 134
Chromobacterium violaceum CV026, *Burkholderia cepacia* isolates induced violacein production in, 336
Ciliate protozoa, in sheep rumen, phylogenetic study of methanogens associated with, 123
Citrus variegated chlorosis, in sweet orange, triply cloned *Xylella fastidiosa* strain induces, 106
Clostridium aminophilum F, ability to resist monensin and counteract potassium depletion by, 226
Cobalt, *Oscillatoria anguistissima* sorption and desorption of, 49
Cold shock proteins, expressed by *Streptococcus thermophilus* after cold shock, 342
Continental subsurface environment, dissimilatory reduction of Fe(III) by thermophilic bacteria and archaea in, 99
Corynebacterium, isolated from landfill, antibiotic response and plasmid profile of, 249
Crohn's disease, seroreactivities against *Mycobacterium paratuberculosis* p36 antigen of patients with, 115
Cry toxin, importance of conserved structure of in receptor binding, 14
Cry1 and Cry2 protoxins, of *Bacillus thuringiensis*, differential activity and activation in *Plutella xylostella*, 159
Cry1Ac toxin, from *Bacillus thuringiensis*, binds to aminopeptidase N of *Bombyx mori*, 14
Cry1C toxin, and loops 2 and 3 mutant proteins, toxicity and binding affinities to *Spodoptera littoralis* and *Aedes aegypti*, 94
cry2Aa1 operon, of *Bacillus thuringiensis* NRD-12, expression of *orf1* gene from, 9
Cry9Da toxin, from *Bacillus thuringiensis*, binds to aminopeptidase N of *Bombyx mori*, 14
CvaA protein, role in secretion of ColV from *E. coli* shown by mutational analysis of, 195
Cytokine production, peritoneal, in mice lungs infected with *Campylobacter jejuni* strains, evaluation of, 129

Dictyoglomus thermophilum Rt46B.1, sequencing and expression of β-mannanase gene from, 351
Dihydroorotase, part of dodecameric ATCase/DHOase complex in *Streptomyces*, 175
dinD gene, in *E. coli*, bile salt activation of promoters of, 68

Elastase activity, in strains of *Vibrio cholerae* O1 and non-O1 serogroups in agar and broth, 73
Enterobacter, isolated from landfill, antibiotic response and plasmid profile of, 249
Enterocin P, biochemical and genetic evidence of production of by *Enterococcus faecium* strains, 282
Enterococcal strains, binding of extracellular matrix proteins to, 327
Enterococcus faecium strains, from fermented sausages, biochemical and genetic evidence of enterocin P production by, 282
Escherichia coli
bile salt activation of stress response promoters in, 68
inhibitory effect of Na^+ on anaerobic growth of, 109
Sinorhizobium meliloti IS*Rm14* related to IS*Ec8* adjacent to locus of enterocyte effacement pathogenicity island of, 274
Exiguobacterium aurantiacum, Na^+-stimulated P-type ATPase in membrane of, 27
Extracellular matrix proteins, protein-binding cell surface components of enterococci and *Streptococcus bovis* strains detected by, 327

Fe(III) reduction, by thermophilic bacteria and archaea in deep subsurface petroleum reservoirs, 99

Genomic analysis, of marine magnetotactic bacterial strains by pulsed-field gel electrophoresis, 219
Glucose-6-phosphate dehydrogenase levels, during axenic fruiting in *Agaricus bisporus* strains, 205

Helicobacter pylori, from different geographic locales, nucleotide diversity among vacuolating cytotoxin (*vacA*) alleles of, 211
hemB gene, encoding 5-aminolevulinic acid dehydratase (ALAD), cloning and sequence analysis of, 103
Herpetomonas anglusteri, characterization of proteinases in, 61
Herpetomonas roitmani, characterization of proteinases in, 61
Histone H1, stochastic nucleosome positioning in yeast chromatin region not dependent on, 168

Immobilized conidia, of *Aspergillus ochraceus* TS, conversion of progesterone to 11α-hydroxy derivative by, 309
Indole, tryptophan biosynthesis and production by mixed ruminal bacteria, protozoa, and their mixture using, 200
Insertion sequence element ISRm14, of *Sinorhizobium meliloti*, relation to IS*Ec8* of *E. coli*, 274
Interleukin 1, mice lungs infected with *Campylobacter jejuni* do not increase production of, 129

Kinetic properties, of purified *Pseudomonas aeruginosa* phosphorylcholine phosphatase, 1

Lactic acid bacteria, expression of shuttle vector containing pediocin operon in, 295
Landfill, antibiotic response and plasmid profile of bacteria isolated from, 249
Leucocin H, from *Leuconostoc* MF215B, characterization, production, and purification of, 43
Leuconostoc mesenteroides Y105, characterization of *mesB* gene and expression of bacteriocins by, 265
Leuconostoc MF215B, characterization, production, and purification of leucocin H from, 43
Levansucrase, from *Acetobacter diazotrophicus* SRT4 secreted via periplasm by signal-peptide-dependent pathway, 146
Light harvesting polypeptides (LHIα and LHIIα), in association with phospholipids are inserted in *Rhodobacter capsulatus* B10 heavy membrane, 37
Lipopolysaccharides, *Actinobacillus pleuropneumoniae* adherence to porcine respiratory tract cells inhibited by monoclonal antibodies directed against, 313
Locus of enterocyte effacement pathogencity island, of *E. coli*, *Sinorhizobium meliloti* IS*Rm14* related to IS*Ec8* located adjacent to, 274
L-serine, tryptophan biosynthesis and production by mixed ruminal bacteria, protozoa, and their mixture using, 200

Macrophage chemoattractant factor (MCP-1), increased mRNA expression of in *Mycoplasma pulmonis*-infected mice, 163
Macrophage inflammatory peptides (MIP-1α and MIP-1β), increased mRNA expression of in *Mycoplasma pulmonis*-infected mice, 163
Magnetotactic bacteria, marine, genomic analysis of, 219
Mannitol dehydrogenase levels, during axenic fruiting in *Agaricus bisporus* strains, 205
Marinococcus albus, biomineralization of carbonates by, 53
Marinococcus halophilus, biomineralization of carbonates by, 53
Megasphaera elsdenii B159, ability to resist monensin and counteract potassium depletion by, 226
Membrane fusion protein family, mutational analysis of CvaA protein as member of, 195
MesB gene, in *Leuconostoc mesenteroides* Y105, localization, cloning, and sequence of, 265
Mesentericin B105, produced and expressed by *Leuconostoc mesenteroides* Y105, 265
Metal ions, effect of presence or absence on kinetic properties of *Pseudomonas aeruginosa* phosphorylcholine phosphatases, 1
Methanobrevibacter smithii, isolation of small subunit rDNA from sheep rumen ciliates phylogenetically close to, 123
Methanosarcina mazei N2M9705, isolated from aquaculture fishpond, characterization of, 79
Methylobacterium mesophilicum, automobile air conditioning systems found to contain, 141
micF gene, in *E. coli*, bile salt activation of promoters of, 68
Monensin, low G + C gram-positive ruminal bacteria resistance to, 226
Monoclonal antibodies, *Actinobacillus pleuropneumoniae* adherence to porcine respiratory tract cells inhibited by, 313
Mucor circinelloides, heterologous expression of *Phycomyces blakesleeanus* phytoene dehydrogenase gene (*CarB*) in, 259
Municipal solid waste, antibiotic response and plasmid profile of bacteria isolated from, 249
Mutational analysis, importance of C-terminal hydrophobic domain of, 195
Mycobacterium paratuberculosis p36 antigen, antibody reactivities of Crohn's disease patients immunoblotted against, 115
Mycoplasma respiratory disease, β-chemokines produced in lungs of mice with, 163

Na^+ extrusion activity, *E. coli* growth in high osmality during fermentation under anaerobic conditions inhibited by, 109
Nitrate transport and reduction, *Anabaena* sp. PCC 7120 mutants altered in, 237
Nonhemolytic phospholipase C, of *Burkholderia cepacia*, effect of iron restriction and choline and phosphate concentrations on expression of, 336
Nostoc calcicola Bréb, energy-dependent Ca^{2+} efflux from cells of, 254
Nucleosome positioning, in yeast Chromosome IX region, no role of histone H1 in, 168

orf1 gene, from *Bacillus thuringiensis* NRD-12 *cry2Aa1* operon, sequence analysis, expression, and start codon of, 9
Oscillatoria anguistissima, sorption and desorption of cobalt by, 49
osmY gene, in *E. coli*, bile salt activation of promoters of, 68

Pediocin operon, in *Streptococcus thermophilus* and other lactic fermentation bacteria, cloning and expression of, 293
Penicillium, wallboard colonized by, 21
Penicillium viridicatum, automobile air conditioning systems found to contain, 141

pH, effect on phospholipid contents of membranes from alkaliphilic bacteria, 270
Phagocytic activity, mice lungs infected with *Campylobacter jejuni* do not increase production of, 129
Phosphate solubilization, by bacteria in alkaline soils, role of salt in, 89
Phospholipid contents, of membranes from alkaliphilic bacteria, effect of growth pH on, 270
Phospholipids, role in insertion of LHIα and LHIIα complexes into heavy membranes of *Rhodobacter capsulatus* B10, 37
Phosphorylcholine phosphatase, of *Pseudomonas aeruginosa*, purification and kinetic properties of, 1
Phycomyces blakesleeanus, heterologous expression in *Mucor circinelloides* of phytoene dehydrogenase gene (*CarB*) from, 259
Phytoene dehydrogenase gene (CarB), of *Phycomyces blakesleeanus* expressed in *Mucor circinelloides*, 259
Plutella xylostella, differential activity and activation of *Bacillus thuringiensis* insecticidal proteins in, 159
Poly(3-hydroxybutyric acid), soil Streptomyces accumulation of, 153
Porcine respiratory tract cells, monoclonal antibodies against lipopolysaccharides inhibits *Actinobacillus pleuropneumoniae* adherence to, 313
Prevotella spp., ruminal, diversity of extracellular proteolytic activities of, 187
Progesterone, transformed to 11α-hydroxy derivative by activated immobilized conidia of *Aspergillus ochraceus* TS, 309
Promoter sequences, from *Streptococcus gordonii* CH1, isolation and characterization of, 321
Proteinases, in *Herpetomonas anglusteri* and *Herpetomonas roitmani*, characterization of, 61
Proteolytic activity
  extracellular, ruminal *Prevotella* species show diversity in, 187
  of *Herpetomonas anglusteri* and *Herpetomonas roitmani*, gelatin-SDS-PAGE detection of, 61
  of *Streptomyces bovis*, 180
PSD–MALDI–TOFMS (post-source delay – matrix-assisted laser desorption/ionization –time of flight mass spectrometry), N-terminal sequence of mature levansucrase from Acetobacter diazotrophicus SRT4 determined by, 146
Pseudomonas aeruginosa, kinetic properties of phosphorylcholine phosphatase of, 1
Pulsed field gel electrophoresis, genome analysis of marine magnetotactic bacterial strains by, 219

Random amplified polymorphic DNA (RAPD) primers, *Xylella fastidiosa* Pierce's disease strains detected by, 85
Receptor binding site, of Cry toxins of *B. thuringiensis* in conserved structure of Cry toxins, 14
Recombinant ManA enzyme, coded by *manA* gene, biochemical properties and substrate specificity of, 351
Restriction fragment length polymorphism analysis, of chromosomal and nodulation genes regions, *Astragalus sinicus* rhizobia characterized by, 358
Rhizobia, of *Astragalus sinicus*, characterized by plasmid profiles and RFLP analysis of chromosomal and nodulation gene regions of, 358
Rhodobacter capsulatus B10, LHIα and LHIIα complexes associated with phospholipids inserted into heavy membranes of, 37
Rhodothermus marinus, cloning and sequence analysis of *hemB* gene of, 103
Ruminal bacteria
  low G + C gram-positive, resistance to monensin and loss of potassium by, 226
  tryptophan biosynthesis and production from indole and L-serine by, 200
Ruminal Prevotella spp., comparison of extracellular activities of, 187
Ruminal proteolysis, role of *Streptomyces bovis* in, 180
Ruminal protozoa, tryptophan biosynthesis and production from indole and L-serine by, 200

Saccharomyces cerevisiae, transcriptional and chromatin effect of overlapping genes in, 369
Selenomonas ruminantium HD4, ability to resist monensin and counteract potassium depletion by, 226
Sheep rumen, phylogenetic study of methanogenic archaea associated with ciliate protozoa in, 123
Sinorhizobium meliloti, insertion sequence element IS*Rm14* of similar to *E. coli* IS*Ec8*, 274
Soil Streptomyces, accumulation of poly(3-hydroxybutyric acid) by, 153
Spodoptera littoralis, mutations of loops 2 and 3 residues in domain II of *Bacillus thuringiensis* Cry1C δ endotoxin affect insecticidal specificity and binding to, 94
Stachybotrys chartarum, sanitation procedures for wallboard colonized with, 21
Streptococcus bovis JB1, ability to resist monensin and counteract potassium depletion by, 226
Streptococcus bovis strains, binding of extracellular matrix proteins to, 327
Streptococcus gordonii CH1, isolation and characterization of promoter regions of, 321
Streptococcus pneumoniae, cloning, sequencing, and chromosomal location of class II aldolase gene from, 31
Streptococcus thermophilus
  cloning and expression of pediocin operon in, 293
  expression of two cold shock proteins by, 342
Streptomyces, isolated from soil, accumulation of poly(3-hydroxybutyric acid) by, 153
Streptomyces bovis, proteolytic activities of, 180
Streptomyces griseus, aspartate transcarbamoylase (ATCase) purified from, 175
Streptomyces spp., from soil and patients, comparison of superoxide dismutases from, 365
Stress response genes, in *E. coli*, bile salt activation of, 68
Substrates, effect on kinetic properties of phosphorylcholine phosphatase of *Pseudomonas aeruginosa*, 1
Superoxide dismutase, from *Streptomyces* spp. from soil and patients, comparison of, 365

Thermophilia archaea, in deep subsurface petroleum reservoirs, dissimilatory Fe(III) reduction by, 99
Thermophilic anaerobic bacteria, in deep subsurface petroleum reservoirs, dissimilatory Fe(III) reduction by, 99
Transcriptional interference, in region of two convergent overlapping genes in *Saccharomyces cerevisiae*, 369
Trehalose phosphorylase activity, during axenic fruiting in *Agaricus bisporus* strains, 205
Trichophyton mentagrophytes, repeated ubiquitin genes in, 302
Tryptophan, biosynthesis and production from indole and L-serine by mixed ruminal bacteria, protozoa, and mixture in vitro, 200
Tumor necrosis factor α, mice lungs infected with *Campylobacter jejuni* do not increase production of, 129

Ubiquitin genes, in *Trichophyton mentagrophytes*, encoded by two Ub repeats. 302
Ustilago maydis, pathogenicity of chitin synthetase mutant of obtained by gene disruption with carboxin-resistant cassette, 291

Vacuolating cytotoxin (vacA) alleles, of *Helicobacter pylori* from different geographic locales comprise two geographically widespread types, 211
Vibrio cholerae, identification and initial characterization of elastase activity associated with, 73

Wallboard, gypsum, colonized with *Stachybotrys chartarum*, sanitation procedures for, 21

Xylella fastidiosa (Pierce's disease) strains, RAPD primers designed for detection of, 85
Xylella fastidiosa strain 9a5c, multiplies and induces symptoms of citrus variegated chlorosis in sweet orange, 106

Yeast chromatin region, stochastic nucleosome positioning in, no dependence on histone H1 in, 168
